Frontend Developer

 lakshmanK1

 lakshman-murthy-774006208

 laxmankamisetty1@gmail.com  +91 7095773657

Experienced Frontend Developer adept at crafting responsive and visually appealing web applications using HTML, CSS, and JavaScript. Proficient in React and Nextjs, with a strong eye for design. Collaborative team player committed to staying current with industry trends.

## EDUCATION

<b>Aditya College of Engineering</b> Bachelor of Technology, Electronics and Communication Engineering	(June 19, 2017 - July 24, 2021)
<b>Aditya Junior College</b> Intermediate, MPC	(June 16, 2015 - June 13, 2017)
<b>Sri chaitanya school</b> SCC, 10th Standard	(June 10, 2014 - June 25, 2015)

## SKILLS

React.js	Node.js	Next.js	Express.js
Javascript	Typescript	MongoDB	Redux.js
React Router	HTML5/CSS3	Restfull Api's	Api Integration
Bootstap	Axios	Git	Webpack
Jest, Chrome Developer Tools	Optimization Techniques	Web Development	Effective Communication

Team Collaboration

## PROJECTS

### Restaurant Website

Web Application

• A functional single page application with Restaurant menu, Cart and a beautiful landing page. • Developed using ReactJS, various react hooks and context API were used to add the desired functionalities. • Implemented various Hooks to effectively function output and inbox features for the website.

 <https://github.com/lakshmanK1/FOOD-ORDER-APP-Project1>

Reactjs, Javascript, Context Api, Html/Css

### E-Commerce Website

Web applications

• Built the entire project from Sign up screen to verifying entered email and integrating all the functionality with firebase. • Used React Router to seamlessly navigate through all the tabs in the website. • Applied various hooks and firebase authentication, real-time database services into the website.

 <https://github.com/lakshmanK1/E-COMMERCE-WEBSITEv>

Reactjs, Javascript, LocalStroage, Authentication, Firebase, Applications state management, React router, Html/Css

### Expense Tracker website

web application

• Dynamic Frontend: HTML5, CSS3 and JavaScript. Implemented CRUD operation over firebase backed API and integrated all the frontend feature. • Used React Router to seamlessly navigate through all the tabs in the website. • Applied the redux concepts to entire project, created multiple slices to facilitate proper operations of the website, separate features & UI enabled for premium & non-premium users.

 <https://github.com/lakshmanK1/EXPENSE-TRACKER>

Reactjs, javascript, Redux, Firebase DB, Authentication, styles components, Html/Css

### Mail Box Client Website

web application

• Build an entire project using HTML5, CSS3 and JavaScript, Implemented client side rendering for the website. Applied Redux concepts on entire project. • Applied concepts like context API and CRUD operations through firebase to improve the working efficiency of the website. • Implemented various Hooks to effectively function output and inbox features for the website.

# WORK EXPERIENCE

## Cognizant Technology Solutions

(October 21, 2021 - May 30, 2023)

Frontend Developer

- Frontend developer with experience in design and developing high-quality code, user friendly, highly responsive websites implementing best practices using Reactjs, Reduxjs, Javascript, Typescript, Css, Html.
- Knowledge in good industrial practices in React app development. As a frontend developer I am responsible for building functionality, re-usable, optimized, bug free code logic for react components.
- Worked with jest and react testing library to develop the unit testing code for web and mobile applications.
- For creating of single web applications worked with react router dom. Network calls using axios.
- For managing and centralizing react application state worked with Reduxjs. And for simple data sharing between tree of components as well as to avoid prop drilling used Context api.
- Worked on firebase and other libraries for creating user login/signup functionality to authenticate the users.
- Created logic code, when user send a text message it should be store in database with sender and receiver details to make receiver will get text message with a notifier for end-to-end chat web application.

## Aissel Technologies

(June 05, 2023 - October 30, 2023)

Member of Technical Staff

- Aissel Technologies is a leading provider of enterprise SaaS application for Medical Opinion Leader Management.
- Worked on AI powered Konectar2.0 software product development using nextjs, reactjs.
- Worked on client specific and generic frontend modules like client, role, user modules etc. Also integrated api's and performed crud operations for every frontend module.
- Manipulating response data from api by updating key/value in data according to our need. Created new axios instance and axios service file which have various methods to perform crud operations.
- Used Tabulator library for dynamically displaying details in tabulator format and performing asynchronous operations.
- Extensively used rsuite library components in clients, roles, users frontend modules. For layout responsiveness used react bootstrap row and col components.
- Created reusable components to use in different frontend modules by importing components. Reusable components like form input fields, buttons, tabulator layout, custom cards, select picker, checkbox, checktree etc.

# CERTIFICATIONS

## React the complete guide,Udemy (2021)

Udemy

Learned React working with JavaScript, HTML, CSS, Redux, Routing. Covered topics like react hooks, context Api, custom hooks, optimizing techniques, state management.

## Web Development,Sololearn(2021)

SoloLearn

Learned HTML5, CSS3 and JavaScript

## JavaScript Bootcamp

Udemy

Learned JavaScript from scratch and applied skill on real time application build.

# INTERESTS

Continuous Learning

Cross-Browser Compatibility

Web Performance Optimization

Web Accessibility Advocacy

Collaborative Team Player

Community Engagement

Problem Solving
